Deploying the Python requests Library

Nick Russo NETWORK ENGINEER

@nickrusso42518 www.njrusmc.net

Agenda

Introducing "requests"

Handling multi-step authentication

Challenges:

- Get list of managed devices
- Add a new device

Course wrap up

Demo

Handling DNA center authentication

Challenge 1: DNA Center Device List

Use DevNet API Documentation

Use Postman to Test API Calls

Demo

Challenge 1: Collecting the device list from DNA center

Challenge 2: Add a New Device

Use DevNet API Documentation

Use Postman to Test API Calls

Demo

Challenge 2: Adding a new device to DNA center

Challenge: Remove a device

Final Thoughts

Good design →
Good outcome

Keep using Git

APIs; all shapes and sizes
